OUR STRENGTH IS YOUR SAFETY

TO CLOSE OFF OPENINGS WHERE REGULAR SAFETY GATES DON'T FIT

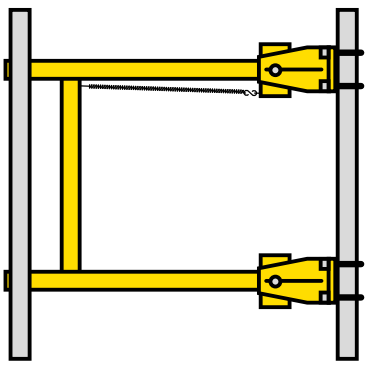
NARROW WALKWAY SAFETY GATE

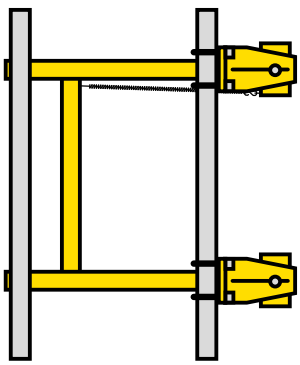
In certain cases, a regular safety gate does not fit because the walkway or platform is too narrow, or the gate can not open entirely because of space constraints. The solution here is our NARROW WALKWAY SAFETY GATE (NWG).

The Narrow walkway safety gate is a spring-operated, stainless steel gate suitable for openings between 500 - 800 mm. The NWG is a reliable, easy to install self-closing safety gate.

Key properties

- Safely closes off ladder openings, unlike chains or simple bars;
- Made of stainless steel 304, coated with RAL 1023 yellow;
- Meets the European standard EN ISO 14122;
- Can be used in tight or narrow spaces where regular safety gates don't fit;
- One size fits all: the gate is suitable for openings between 500 - 800 mm;
- Spring loaded (stainless steel 316) soft-close system;
- Maintenance free;
- Easy installation;
- Quick delivery from stock.





Depending on how the gate's brackets are installed, the gate can be used for openings between 500 and 800 mm.

For installation on angle steel, round or square tube, additional installation kits are available.
