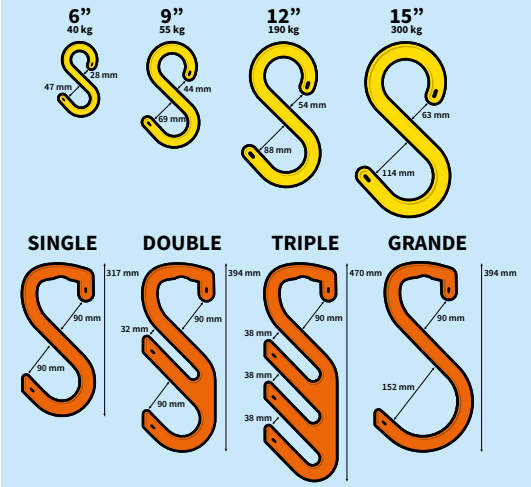
INTREPID SAFETY PRODUCTS

**OUR STRENGTH IS YOUR SAFETY**

**REDUCE TRIPPING HAZARDS**

# SAFETY HOOKS



**SAFETY HOOKS: using these safety hooks makes it extremely easy to suspend cables, electrical wires, hoses, and other work lines. They contribute to improved accessibility by clearing the work floor, and greatly reducing tripping hazards. These hooks have been used successfully in many plant construction, turnaround, and maintenance situations.**

## Easy usage

The hooks can be used instead of ropes, lashing, or plastic tie wraps which can often be cumbersome and require at least 2 (or more) hands to lift and secure the cables and hoses. Simply position the hook, and then lift the work lines into place. A hole in each end of the hook enables the user to easily secure the load on the safety hook by means of a tie wrap. The hooks are reusable for various situations and locations.

**The Double and Triple safety hooks have unique multiple hooks: organize, add and remove cables and hoses with ease and hassle-free.**

## Tough, strong construction

The safety hooks are available in 8 sizes, designated as 6”, 9”, 12”, 15”, Single, Double, Triple and Grande. For easy recognition, the parts are colored throughout with high visibility safety yellow or orange. The molded plastic does not damage your paint-work or cut or puncture your cables. NOTE: The hooks are not suitable for lifting.

Please note that the yellow 6”, 9”, 12” and 15” safety hooks are only available in boxes with 25 pcs/box, and that the orange Single, Double, Triple and Grande safety hooks are only available in boxes with 20 pcs/box.

The safety hooks are strong enough to hold your wires, cables, and hoses safely off the ground for a safer and tidier workplace.

### Key features

- Simple, safe and strong;
- Easy, one-handed installation;
- Reusable;
- Do not damage paintwork or puncture cables;
- Long service life.
